New model features ...

- Specially designed ergonomics grip, reduces vibration by 25%!
- Eliminates bone chilling effects of aluminum-housed air motors!

Air Model

"AS-6" Multi-Purpose Bone Saw

B&D's new and improved Model "AS-6" is lighter, faster and more powerful than the former "AS-6". It features a new ergonomic grip, reduces vibration up to 25%, eliminates bone chilling effects of aluminum-housed air motors. Multiple rear-end exhausts available. Full 2" (50.8mm) depth of cut. Specially designed for breaking and scribing ribs, removing contaminated backbones, removing arthritic joints and opening hog aitchbones and is a very popular machine for cutting the lamb breast or sternum on the kill line. This machine is available as standard at 6200 RPM and there is also a high torque version which rotates at 4700 RPM which is designed to handle the tougher jobs. Other tool features include:

- A level-style adjustable depth gauge guard,
- Instant stop 6-1/2" (165.10 mm) saw blade,
- Net weight only 6 lbs 12 ozs. (3.08 Kilos),
- If required, machines can be counterbalanced using a #6342300 balancer - 6.56 ft.(2m) cable travel.
